

agrofog®

Thermal Fog Generators

NEW IGNITION SYSTEM

- immediate start-up
- no petrol overflow
- less maintenance

New System

Characteristics

When we set out with the firm intention of producing the best equipment in the market, we had the advantage enjoyed by every new company: **there were no technical limits imposed by an existing range of models!**

This unit has been designed for use with insecticides, acaricides and fungicides (mostly wettable powders) which are **soluble in oil or water**. Light in weight for convenient use in areas where poor road and tracks make it difficult to handle heavy equipment. The only mass produced unit with air intake valve covered, providing a **silencer effect and protection against dust and solution particles**.

- **Petrol Tank** made from stainless steel
- **Fog Tube** made from stainless steel
- **Formulation Tank** made from stainless steel
- **Cooling Jacket** made from enamelling sheet

All other parts getting in contact with the chemicals are made from **brass, viton or teflon**.

Emergency cut-off device for solution available upon request.

Technical Specifications

Weight in kg, empty but ready for use	7.9kg
Dimensions L x W x H in cm	137.5 x 27 x 34
Solution Tank capacity in l	5.7* or 10
Fuel consumption, approx. in l/h	2.0
Performance of combustion chamber in KW/HP	18.7/25.4
Maximum flow rate, approx. in l/h	42
Effective horizontal reach, indoors approx. in m water based with carrier i.e. X - 10 oil based	40 >100
Power Supply (flashlight batteries)	4 x 1.5 V LR20 (LR6 option)

*standard

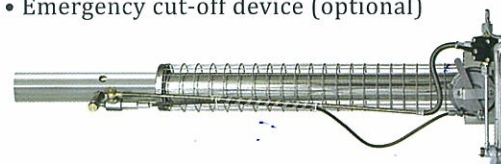

Considering the maximum flow rate, an operator can treat at a flow rate of 1 litre/2.500 m³ up to 105.000 m³/h or 3.708.000 ft³/h

Special Executions

- Dual-purpose cone shaped fog tube for both oil and water based fogging (Patented)

- Emergency cut-off device (optional)
