

# Wasp Protective Suit

## Usage

Wasp Protective Suit provides effective and comfortable protection against stings from bees, wasps and hornets.

## Feature

1. Head: Made from glass fiber and an adjustable chin strap inside
2. Face: Made of P.C at an angle of 360°  
Hard-Coating outside and Anti-Fog Coating inside
3. Wasp Protective Suit is composed of three-layer fabrics.  
First layer: Special machining nylon (prevent bees from sticking on the suits)  
Second layer: PVC nylon Coating Fabric (protection against stings)  
Third layer: Polyester Mesh (light, comfortable, cool and breathable)
4. Wasp Protective Glove is composed of four-layer fabrics. Special fabric between leather prohibit sting. A good fit for use in a long time without discomfort.
5. Wrist Armors keep the jacket staying put when arms are lifted and make no room with gloves.
6. Two-layer bands on ankles prevent bees from getting into the pants.
