

# talon<sup>®</sup>P

RODENT BAIT  
PELLETS

### Product Highlights

- Low-dose, single feed anticoagulant
- High quality grain-based pelletized bait that is highly palatable to rodents
- Kills resistance rats
- Contains Bitrex<sup>®</sup> human taste deterrent

### What is TALON<sup>®</sup>?

TALON<sup>®</sup> is a versatile rodenticide containing 0.005% brodifacoum that has been proven highly successful throughout the world for more than 20 years. As well as being the world's most effective rodenticide, it is also amongst the most powerful. This is illustrated for commensal rodents in Tables 1 and 2.

As an anticoagulant, TALON reduces the ability of blood to clot. Rodents die by haemorrhaging a few days after consuming a single feed of TALON. The delay ensures that they do not connect the illness with consumption of the baits, so they do not become bait-shy.

TALON pellet is made from high quality grain to ensure that it is highly palatable to rodents. It is suitable for use in most domestic, public and commercial premises.

Table 1.

<b>Acute Oral LD<sub>50</sub> of various anticoagulants to <i>Rattus norvegicus</i></b>			
Rodenticide	LD <sub>50</sub> (mg/kg)	Normal bait concentration (% ai)	LD <sub>50</sub> (g of bait/250g rat)
brodifacoum (TALON)	0.2 - 0.27	0.005	1.1-1.4
bromadiolone	1.1-1.8	0.005	5.7-9.0
difethiolone	0.56	0.0025	5.6
coumatetrally	16.5	0.0375	11.0
warfarin	14-323	0.025	323

Table 2.

<b>Acute Oral LD<sub>50</sub> of various anticoagulants to <i>Mus musculus</i></b>			
Rodenticide	LD <sub>50</sub> (mg/kg)	Normal bait concentration (% ai)	LD <sub>50</sub> (g of bait/25 g mouse)
brodifacoum (TALON)	0.40	0.005	0.2
bromadiolone	1.75	0.005	0.9
difethiolone	1.29	0.0025	1.29
coumatetrally	>1000	0.0375	>66.5
warfarin	374	0.05	18.5

## DIRECTIONS FOR USE

**READ THE LABEL:** Read the product label and follow all use directions and use precautions.

**Important:** Do not expose children, pets, or other non target animals to rodenticides. To help to prevent accidents:

1. Stored product not in use in a location out of reach of children and pets
2. Apply bait in locations out of reach of children, pets, domestic animals, and non target wildlife, or in tamper-resistant bait stations.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on product label.

### Use Restrictions

For control of Norway rats, house rats and mice in and around homes, industrial, commercial, public buildings and similar manmade structures. This product may also be used in transport vehicle and in and around related port or terminal buildings. DO not use in sewers. Do not place bait where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

### Selection Of Treatment Areas

Determine areas where rats and/or mice will most likely find and consume the bait. Generally, these areas are along walls, by gnawing openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been observed. Remove as much food as possible.

## APPLICATION DIRECTIONS

### Norway and House Rats

Apply 20-50 g bait (usually at 5-10 m.) per placement. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease.

### House Mice

Apply 5 g per placement. Space placements at intervals of 3-5 m. Where very high mouse activity is present, apply 10 g bait per placement. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mouse activity cease.

### Rats and Mice

Replace contaminated or spoiled bait immediately. Collect and dispose of all dead rodents and leftover bait properly. To prevent reinfestation, limit sources of rodent food, water, and harbourage as much as possible. Where a continuous source of infestation is present, maintain permanent bait stations and replenish with census or bait as needed.

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

### Storage

Store only in original container in dry place inaccessible to children and pets.

### Pesticide Disposal

Dispose of waste resulting from the use of this product according to your local authority. Never place unused product down any indoor or outdoor drain.

**READ THE LABEL BEFORE USE: USE PESTICIDES SAFELY**
